DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a. The species of the optical system being comprised of a SONET, MUX and amplifiers comprising a first embodiment which corresponds to Figure 3;
 - b. The species of a constitution of nodes for use in an optical system comprising a second embodiment which corresponds to Figure 4;
 - c. The species of an arrayed waveguide grating comprising a parabolic element comprising a third embodiment which corresponds to Figure 5;
 - d. The species of an arrayed waveguide grating comprising a tapered element comprising a fourth embodiment which corresponds to Figure 6;
 - e. The species of an arrayed waveguide grating comprising both tapered and parabolic elements comprising a fifth embodiment which corresponds to Figure 7;
 - f. The species of an arrayed waveguide grating comprising multi-mode interference elements comprising a sixth embodiment which corresponds to Figure 12;
 - g. The species of an output waveguide comprising first, second and third regions of differing geometries comprising a seventh embodiment which corresponds to Figure 14
2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement be traversed.
3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2882

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Specification

6. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter. Also, please correct any errors of which you may become aware between the Specification and Drawings.

Drawings

7. The drawings are objected to because of omissions or inconsistent of characters from the drawings and inconsistencies between the Specification and Drawings. Examples of such errors

Art. Unit: 2882

include reference to Figure 15 in the specification for items shown in Figure 14; and misrepresentations of items 136 and 137, first and second slabs, of Figures 6 and 7. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
